General Comments:

I arrived to perform a random inspection and was accompanied by the manager. The facility was being cleaned at the time of inspection. The facility was clean, there was no odor, and ambient temperature was adequate. The cats were being kept in adequate numbers in their respective areas. There was no sign of illness in the general population. Continue to remove/replace damaged cat towers when they become damaged. There are screws in FRP that are becoming corroded or rusting and should be replaced while they can. Since the last inspection the cabinets have been replaced in the kitchen area with a laminate coated material.
